

TRIM-KUT®

Trim-Kut® is a revolutionary abrasive disc designed to grind and finish a wide variety of materials faster and cooler than any other abrasive disc available today. The patented process of fusing premium abrasive grains to a durable polymer backing results in a highly versatile grinding tool that requires no backing pad. Trim-Kut® is readily trimmable to either renew the cutting surface or reduce the diameter.

Trim-Kut® discs are available in 3" and 5" for use on a drill or die grinder and 4.5" for use on an angle grinder.

These durable discs can be used for grinding or sanding. Their unique one-piece design eliminates the need for backing pads. Another major feature is that the discs can be trimmed. When the outside edge is loaded to the point where it is not grinding effectively, trim it off.

ALUMINIUM OXIDE

Standard Trim Kut© with Aluminium Oxide. For the most common industrial applications.

SILICON CARBIDE

Same great Trim Kut© with Silicon Carbide minerals, great for use on stone and non ferrous metals.

SOFT METAL DISC

Same great Trim Kut© now available in SMD formulation, specially lubricated to prevent soft metal loading.

SURFACE PREP

Trim Kut© easy to mount on piece design comes with a medium surface conditioning pad already mounted. Ready to use for finishing and preparation of surfaces.

DEPRESSED CENTER

Specially designed for use on 115 and 125 mm grinders, no special adapters required.

ADAPTERS & MANDREL

Variety of mandrels and adapters are available to use Trim Kut© with almost any tool.

- UNIQUE ONE PIECE DESIGN
- NO BACKING PAD
- GRINDS, SANDS, LEVELS WELD SEAMS
- EXCELLENT RUST/PAINT REMOVER

Trim-Kut® is a revolutionary abrasive disc designed to grind and finish a wide variety of materials faster and cooler than any other abrasive disc available today. The patented process of fusing premium abrasive grains to a durable polymer backing results in a highly versatile grinding tool that requires no backing pad. Trim-Kut® is readily trimmable to either renew the cutting surface or reduce the diameter. Trim-Kut® discs are available in 77 mm and 127 mm for use on a drill or die grinder and 115 mm for use on an angle grinder. These durable discs can be used for grinding or sanding. Their unique one-piece design eliminates the need for backing pads. Another major feature is that the discs can be trimmed. When the outside edge is "loaded" to the point where it is not grinding effectively, trim it off.
